

Job Description

HedgeSPA Pte Ltd.

About the company:

The Company offers Sophisticated Predictive Analytics to Hedge Funds and Institutions, thus our acronym HedgeSPA. Our core investment analytics platform, powered by artificial intelligence, big data and cloud computing, empowers professional investors with asset selection algorithms, which automates decision flow with immediacy and user friendliness. Our unusually powerful and proven analytics platform was recognized by the Monetary Authority of Singapore with its 2017 FinTech award, among many global accolades. The company is going through a significant round of financing and yet is able to retain a significant pool of founder and employee equities. We are looking for dynamic developers to be based in Singapore, Hong Kong, Shenzhen and/or Shanghai, working on state-of-the-art technology in collaboration with our global R&D partners spun off from the likes of Stanford, Imperial College and Bell Labs. We invite those with solid technical skills and desires for success not just to attend conferences to hear about FinTech success stories, but also to take the concrete step to apply for a position at a global leader in applying extreme technologies to applications in finance.
